Round 3 — 100 independent owner-dentist practices whose websites are materially weaker than the business

Final prospects	100
Bench (profiled, below cut)	63
Score range (top 100)	68 – 82 / 100
Practice entries screened	9,712
Live URLs	97 HTTP 200 + 3 verified bot-walls

Regions	Northeast 22 · Mid-Atlantic 22 · Southeast 15 · South-Central 16 · Midwest 15 · West 10
Run date	September 30, 2026

Method

Two waves of six regional research agents (Northeast, Mid-Atlantic, Southeast, South-Central, Midwest, West) screened practices in fresh round-3 territories. Every finalist website was fetched directly and fingerprinted from raw HTML (title tags, footer vendor credits, generator tags, © strings), screened for DSO/corporate ownership, and scored with the fixed 100-point rubric.

Wave 1 built the pool; wave 2 enriched every finalist with review counts (Birdeye, Healthgrades, Demandforce, Yelp/WebMD, on-site schema.org ratings), re-scored, and screened unmined territory via directory crawls + raw-HTML fingerprinting + hand verification.

Scoring weights: Financial Capacity 20 · Business Maturity 15 · Website Weakness 15 · Business-vs-Website Gap 15 · Customer Website Dependence 10 · Design Transformation Potential 10 · Conversion Opportunity 5 · Existing Digital Spending 3 · Decision-Maker Accessibility 2. Ranking: score, then conversion likelihood.

Evidence tags: VERIFIED (seen directly), INFERRED (reasoned from observable facts), UNKNOWN (not found). Financial capacity is always inferred from publicly observable business scale, pricing, facilities, service positioning and market — never invented.

Quality checks

- Liveness: 97/100 return HTTP 200; the rest are Cloudflare bot-walls whose content was verified from recent archived copies. 0 dead.
- Exclusions: 0 overlap with Rounds 1–2 by name, domain, or any domain mentioned inside a profile. One prior-round practice returned by research (Bruce Matthews DDS, Wilmington DE) was caught and removed.
- Cross-region duplicates: 0. Independence: every profile carries a status and basis; max two MEDIUM-confidence entries in the top 50 (Oak Brook Dental Center demoted from #37 to #51 to respect the cap).
- Removed during QC: Aesthetic Dental Innovations (site suspended); Capitol Hill Dentistry, David Faget DMD, Premier Dental Care Pleasanton (thin review evidence).

Caveats

- Review counts come mostly from Birdeye (aggregates Google), Healthgrades, Demandforce or Yelp as named per profile; treat as directional and confirm before outreach.
- Independence is INFERRED for most practices (no group language, owner-named entity, no DSO strings) — confirm ownership on the first call.
- "Copyright © 2019 Prosites, Inc." quotes the ProSites v4 engine string in page source; the visible footer year may differ.
- Facebook/Instagram posting activity was not checked (platforms block logged-out access from cloud servers); see SOCIAL_AUDIT.csv for the prepared checklist.
